TITLE : OPTICAL STORAGE DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To set the optimum recording power which does not destruct data of an adjacent track.

SOLUTION: This device is provided with a laser diode emitting the beam, and by an adjacent track confirming part 205, the trial writing of a 1st test pattern is made on the test area of a medium by the beam emitting drive of the laser diode with the specified emitting power. Next, after the trial writing of a 2nd test pattern is made specific number of times by specifying a specific sector 242 on a specific track of the test area, the adjacent sector 244 is reproduced and no existence of data destruction is confirmed, then the power is set as the optimum one.
